Sign permits	\$45
Accessory building fee multiplier	0.00572
Basement remodel / renovation	Subject to plan review
Fences	Subject to plan review
Demolition permit	Subject to plan review

---

The Permit Fee Multiplier uses Building Valuation Data as published by the International Code Council. Building permits are figured using the following formula:

Total square footage X Construction cost per square foot X Fee multiplier.

For example: 1,500 square foot house X \$64 construction cost per foot X .000572 = \$549.12.

**The construction cost is determined by the Building Inspector, using IBC Building Valuation Data.**

Accessory buildings, basement remodels, and other similar new construction is also figured using the fee multiplier. Construction costs vary for these permits, based on IBC Building Valuation Data.

The permit fee for these permits also vary, based on the scope of the plan. (For example, a basement remodel which includes a new bathroom will cost more than a basement remodel without any new plumbing.)
